## Laboratory tests show inactivation of MS-2 bacteriophage virus and Staphylococcus epidermis.

Air Knight® IPG®, now improved with carbon fiber ionization brushes for increased ion production, is a unique bi-polar ionization system providing air with both positive and negative ions that encourage airborne particles to gather together, making your existing air filter system more efficient.

In addition to the IPG® feature, PX5 UV provides germicidal dose of UV-C where the light shines.

Quality construction and high air flow design ensures the Air Knight® IPG® can handle the air volume from today's high SEER and commercial HVAC system.

ZERO OZONE EMISSIONS - MEASURED OZONE EMISSIONS FROM AIR KNIGHT IPG DURING USE PHASE DOES NOT EXCEED 0.005 PPM AS TESTED BY UL 867.
